“SWAMPED”

100 Ways in 100 Days

How the Trump Administration Has Flooded the Swamp in Washington

A report by the Democracy Reform Task Force

April 27, 2017
Executive Summary

President Donald J. Trump campaigned on the promise to “drain the swamp” in Washington. He vowed that as President he would take steps to break the “cycle of corruption” and end “decades of special interest dealing,” 1 and he pledged to aggressively pursue meaningful reforms to improve transparency and accountability in government. 2 As President Trump approaches his hundredth day in office, this report seeks to measure the progress of the new Administration in this effort.

A comprehensive review of action to-date suggests the Administration’s record does not match Donald Trump’s campaign rhetoric. Specifically, the analysis below lays bare how the Trump Administration has:

• Made a Mockery of Ethics Law and Regulation
• Promoted a Culture of Secrecy in the Executive Branch
• Stacked His Cabinet with Big Money Campaign Donors
• Installed a Special Interest Revolving Door into the Trump White House
• Put Big Money Ahead of the Public Interest
• Turned the Presidency into a Profit-Making Enterprise
• Pursued Public Policy for His Personal Benefit
• Raided the Treasury to Pay for Vacation & Private Business Promotion

Instead of “draining the swamp,” the Trump Administration is testing the outer limits of the laws and norms in place to prevent corruption and promote accountability. At the same time, as this report demonstrates, the Trump Administration is breaking its promise of “transferring power to the people,” instead empowering a narrow class of wealthy and well-connected insiders.

Made a Mockery of Ethics Law and Regulation

On January 28th 2017, a week into his Presidency, Donald Trump signed an Executive Order that was purported to be his first step in delivering on his campaign promise of “draining the swamp.” Yet, the ethics executive order was another example of President Trump’s tendency to over-promise and under-deliver. Specifically, the so-called “Ethics Pledge” – which replaces President Barack Obama’s ethics Executive Order 13490 – contains several significant policy changes that dramatically undermine the stated goals of the effort, which predictably have led to a series of ethics violations by White House staff.

Promoted a Culture of Secrecy in the Executive Branch

In the years preceding his campaign for President, Donald Trump often criticized the Obama White House for its supposed lack of transparency – going so far as to label President Obama the “least transparent President ever.”3 Ironically, since taking the oath of office, President Trump has moved quickly to institute a culture of secrecy in the Executive Branch and the White House.

**Stacked His Cabinet with Big Money Campaign Donors**

Throughout the Presidential campaign, candidate Trump decried the influence of campaign donors and well-connected insiders. As President, he promised he would dismantle the “rigged” political system that rewards campaign donors with plum cabinet posts and would change the system of the “powerful protecting the powerful.”  

However, President Trump has stacked his cabinet with many of his largest campaign donors and has relied on numerous well-connected Washington-insiders for top agency positions.

Installed a Special Interest Revolving Door into the Trump White House

Donald Trump made criticism of Washington lobbyists and special interests a hallmark of his campaign for the White House, pledging regularly that he would exclude special interest lobbyists from his Administration’s staff. \(^5\) In June 2016, he went so far as to declare he would have “no problem” banning lobbyists from working in his Administration. \(^6\) Since taking office, the Trump White House has broken that pledge, stocking the White House and the broader Executive Branch with long-time Washington lobbyists and influence peddlers.

Put Big Money Ahead of the Public Interest

During the 2016 election, candidate Donald Trump was quite candid about how big money operates in the American political system. During his stump speeches, he would often brag about his own campaign contributions to politicians and the influence they bought, declaring, “As a businessman and a very substantial donor to very important people, when you give, they do whatever the hell you want them to do.”  

Trump pledged that he would do things a different way. “I turned down $5 million last week from a very important lobbyist because there are total strings attached to a thing like that. He’s going to come to me in a year or two years and he’s going to want something for a country that he represents or a company that he represents. That’s the kind of money I won’t take,” he promised. Yet, despite this promise and many more like it, President Trump is giving big donors a big hug.

Turned the Presidency into a Profit-Making Enterprise

Since taking office, President Trump has not taken concrete steps to unwind his business interest in his many companies and investments, despite the ongoing calls by ethics experts and watchdog organizations. Predictably, this has led to numerous instances in which the Trump Organization has seemingly profited from the Office of the Presidency, as foreign governments, domestic interests, and high-powered individuals seek to curry favor with the new Administration by doing business with the Trump Organization. What’s more, this behavior doesn’t stop with President Trump. Throughout the Trump Administration, senior officials seem to be embracing their public service as a means for private gain.

Pursued Public Policy for His Personal Benefit

President Trump's business interests seem to be coloring his pursuit of certain policy priorities. In several instances, the Trump Administration has avoided policy detrimental to the Trump Organization, while in other instances, the Administration has pursued policy that would directly benefit his bottom line.

Raided the Treasury to Pay for Vacations & Private Business Promotion

President Trump has embraced frequent travel since assuming the Office of the Presidency at great expense to the American taxpayer – and often to the benefit of the Trump-owned properties, which he visits. At the same time, his adult children – namely, his two sons who manage the family business’s day-to-day operations – continue to exhaust significant taxpayer dollars on Secret Service protection as they travel the globe in promotion of their private interests, all with the false imprimatur of the United States government.

**Conclusion**

At President Trump’s inauguration on January 20, 2017, he made a critical promise to the American people. The President declared:

> For too long, a small group in our nation’s Capital has reaped the rewards of government while the people have borne the cost. Washington flourished – but the people did not share in its wealth. Politicians prospered – but the jobs left, and the factories closed. The establishment protected itself, but not the citizens of our country. That all changes – starting right here, and right now. Because today we are not merely transferring power from one administration to another, or from one party to another – but we are transferring power from Washington, D.C. and giving it back to you, the American People. 10

So far, President Trump has broken this promise to the American people. As this report details, President Trump has failed to transfer power to the American people and instead has flooded the proverbial “swamp” and accumulated even greater power in the hands of a select few. Americans of all political stripes should be concerned by the Trump Administration’s actions and should ask themselves, with these facts in-hand, “Whose side is the President on?”

About the Democracy Reform Task Force

The Democracy Reform Task Force is a bold effort in the House of Representatives to build a government that puts public interest ahead of special interests. Sadly, despite promises to “drain the swamp,” President Trump and the Republican-controlled Congress are quickly pursuing an agenda that primarily benefits the wealthy and well-connected, while testing the long-established norms and laws that prevent public corruption.

To fight back, the Democracy Reform Task Force – Chaired by Congressman John Sarbanes – is working to confront the Trump Administration’s conflicts of interest and ethical lapses, and fight back against special-interest policies in Congress, while advancing positive reforms to improve accountability and transparency in government.

2 Trump’s Ethics Pledge Eviscerated Lobbyist Limits: President Trump has eliminated entirely an ethics provision enacted by the Obama Administration that prohibited lobbyists from working for federal agencies they lobbied in the prior two years. (Source)

3 Trump’s Ethics Pledge Contains Enormous Lobbying Loophole: Trump Ethics Executive Order includes an enormous exemption to its purported two-year post-White House lobbying ban, permitting former Trump White House employees to lobby the Trump Administration on government rulemakings, adjudications and licensing activities. This is in direct contradiction to the Ethics Executive Order’s promise former Trump officials will be “banned” from lobbying for two years. (Source)

4 Trump’s Ethics Pledge Promotes Shadow Lobbying: Trump’s Ethics Executive Order does nothing to address the massive shadow-lobbying industry that has sprung up in recent years to avoid lobbyist registration requirements; given the strict definition used by Trump Executive Order, White House officials would still be very much able to work as “strategic advisors” or “policy historians,” doing a complete end-around of the purported intent of the Executive Order.
